

Brainstorming & Idea Prioritization Template

Date	25 June 2026
Team ID	
Project Name	OptiCrop: Smart Agricultural Production Optimization Engine
Maximum Marks	3 Marks

Step 1: Brainstorm and Idea Listing

The team conducted a brainstorming session to identify real-world problems that could be solved using Artificial Intelligence and Machine Learning. Various project ideas related to agriculture, healthcare, education, and sustainability were discussed. After evaluating the potential impact and feasibility of each idea, the team shortlisted concepts suitable for implementation within the project timeline.

S.No	Team Member	Idea / Suggestion	Category	Group No.
1	Mohammed Sadia Rahmatunnisa	AI-based Crop Recommendation System	Artificial Intelligence	1
2	Akhil Varma	Smart Fertilizer Recommendation	Machine Learning	1
3	Done Divya	Plant Disease Detection	Computer Vision	2
4	Ullingala Swathi	Smart Irrigation System	IoT & AI	2
5	Yamini Karumuri	Weather-based Crop Advisory	Data Analytics	3

Step 2: Idea Prioritization

The shortlisted project ideas were evaluated based on feasibility, dataset availability, technical complexity, and real-world applicability. The team selected OptiCrop – Smart Agricultural Production Optimization Engine because it addresses the challenge of crop selection using Machine Learning and has the potential to improve agricultural productivity through intelligent crop recommendations.

Group No.	Final Idea	Feasibility (High/Medium/Low)	Importance (High/Medium/Low)	Priority	Selected (Yes/No)
1	OptiCrop: Smart Agricultural Production Optimization Engine	High	High	1	Yes
2	Plant Disease Detection	Medium	High	2	No
3	Weather-based Crop Advisory	Medium	Medium	3	No
