Maximum Marks	4 Marks

Empathy Map

The purpose of this empathy map is to understand the needs, challenges, thoughts, actions, and emotions of farmers while selecting suitable crops for cultivation. By analyzing the farmer's perspective, the OptiCrop system is designed to provide AI-based crop recommendations using soil nutrients, weather conditions, and environmental factors. This helps ensure informed decision-making, improves crop productivity, and reduces the risk of crop failure.

SAYS	THINKS
• Which crop should I grow? • I need better crop yield. • I want accurate recommendations.	• Will this crop give more profit? • Can AI really help me? • Which fertilizer should I use?
PERSON A NAME <i>Farmer</i>	

DOES

- Checks soil conditions before sowing.
- Consults experienced farmers.
- Tries different crops every season.

FEELS

- Confused about crop selection.
- Worried about financial loss.
- Hopeful for better productivity.
