

Communication

Date	03 July 2026
Team ID	
Project Name	OptiCrop – Smart Agricultural Production Optimization Engine
Maximum Marks	1 Mark

Communication Plan:

Effective communication played an important role in the successful development and demonstration of the OptiCrop – Smart Agricultural Production Optimization Engine project. The team communicated regularly to discuss project progress, assign tasks, resolve technical issues, and review completed work. Communication was carried out through WhatsApp, GitHub, and Google Meet, ensuring smooth collaboration throughout the project lifecycle. Regular updates, bug discussions, code reviews, and feedback sessions helped the team complete the project efficiently and prepare for the final demonstration.

S.No	Communication Type	Frequency	Channel / Tool	Participants	Purpose
1	Team Standup	Daily	WhatsApp Group / Google Meet	All Team Members	Discuss daily tasks, progress, and blockers.
2	Progress Update	Weekly	GitHub, Google Meet	Team Lead & Members	Review completed work and assign upcoming tasks.
3	Issue / Bug Discussion	As Needed	WhatsApp / GitHub	Developers & Team Lead	Resolve coding issues, bugs, and technical challenges.
4	Stakeholder Review	Bi-Weekly	Google Meet	Team, Mentor	Demonstrate project progress and receive feedback.
5	Final Demo Rehearsal	Once	Google Meet	Entire Team	Practice the final project demonstration before submission.

Communication Challenges & Resolutions:

S.No	Challenge Faced	Resolution / Action Taken
1	Difficulty coordinating team members' schedules.	Planned meetings in advance and communicated through WhatsApp.
2	GitHub collaboration and merge conflicts.	Team members followed a common repository structure and coordinated commits.
3	Debugging Flask application and model integration issues.	Conducted collaborative debugging sessions and verified the application together before final deployment.
