

Demonstration of Proposed Features

Date	03 July 2026
Team ID	
Project Name	OptiCrop – Smart Agricultural Production Optimization Engine
Maximum Marks	1 Mark

Demonstration of Proposed Features:

This document presents the proposed features of the OptiCrop application and confirms their successful implementation and demonstration. The system predicts the most suitable crop based on soil nutrients and environmental conditions using Machine Learning. Each feature was tested during the project demonstration and verified to work as expected.

S.No	Feature Name	Description	Status (Implemented / Partial / Pending)	Demonstrated (Yes / No)	Remarks
1	Home Page	Displays project overview and navigation options.	Implemented	Yes	Working Successfully
2	Crop Prediction Form	Accepts soil and environmental parameters from the user.	Implemented	Yes	Working Successfully
3	Machine Learning Prediction	Predicts the most suitable crop using the trained Random Forest model.	Implemented	Yes	High Accuracy
4	Prediction Result Display	Displays the recommended crop along with crop image and information.	Implemented	Yes	Working Successfully
5	About Page	Provides project details, objectives, and technologies used.	Implemented	Yes	Working Successfully
6	Responsive User Interface	User-friendly interface built using HTML, CSS, Bootstrap, and JavaScript.	Implemented	Yes	Responsive Design

Feature Implementation Summary:

Total Features Proposed	6
Total Features Implemented	6
Total Features Demonstrated	6
Overall Implementation Rate (%)	100%
